QUOTE

It is clear that the path out of the pandemic is achieving herd immunity via vaccinations. Alhamdulillah, we have made great progress in June. It is uplifting to see that we achieved close to 200,000 doses yesterday and are now ramping up towards a target of 300,000 doses per day. At many PPVs, the spirit of volunteerism is alive and truly showcases the best of Malaysians.

At the targeted pace, we will vaccinate 3 million Malaysians a month, allowing us to get close to herd immunity in the fourth quarter, as envisioned in the National Recovery Plan.

PNB and our companies stand ready to provide any support required for the National Recovery Plan. The path to herd immunity must be a collective effort for the benefit of all Malaysians.
